

Wish Fish Lessons by Heidi Johnson Kindergarten

Objective:

- Students will learn to care for our class Beta Fish.

Each day a class helper will feed the fish and help the teacher care for the tank.

- All students observe the class fish (Wish Fish) and count the marbles in his tank in the morning or during brain breaks.
- Students will complete a variety of lessons based on our wish fish. These lessons include: numbers, blends and diagraphs, and addition/subtraction

Some of these lessons are included here others can be viewed at my TPT site.

<https://www.teacherspayteachers.com/Store/Kindergarten-Blessings>

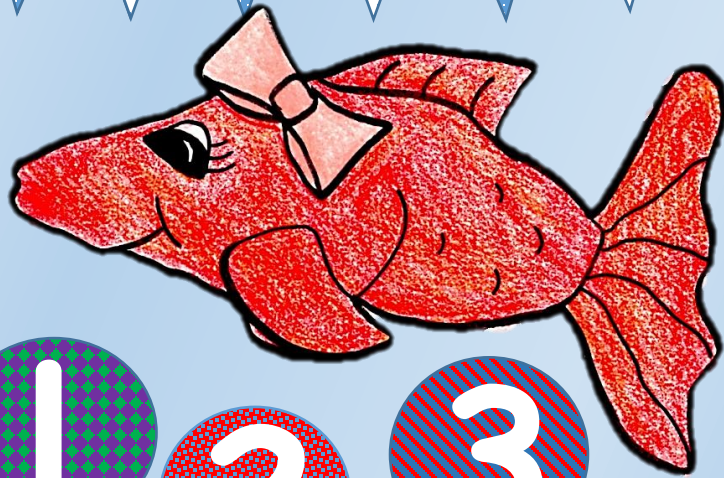

- Students will draw and write about Wish Fish in Centers see photos here at my website:
